

Precision engineering and automatic lock operation for providing unbeatable protection, security, and effortless door functioning for any building or project.

With 2 innovative elements solution; Latch Bolt and Automatic Hook.

The Ultimate Solution for Security and Convenience - ARX COMFORT automatic Door Lock

For more information
please visit ARX web site

ARX COMFORT major benefits:

- 1. The Daytime Release Function (DRF)** offers the flexibility to choose between two different operating modes mechanically.
- 2. Wide range of solutions for different applications.** Modular components design provides a unique and elegant solution, even for French doors, accommodating height adjustments with precision.
- 3. One-piece striker** produced with CNC technology, offers flexible customization options and easy installation, saving time and increasing installation efficiency.
- 4. Automatic closing function** provides extra safety, offering excellent front door operation and also reduces heat loss and the intrusion of ambient noise.

ARX COMFORT Patented solutions

The gearbox mechanism

converts the rotational motion of a key or thumb turn into linear motion to extend the Latch bolt, ensuring smooth and efficient operation and reliable security.

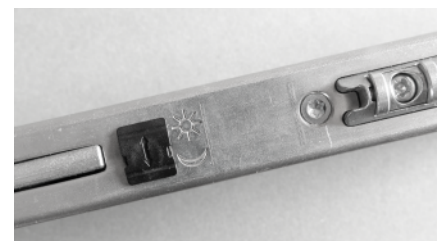

Latch bolt mechanism

For reliable security by keeping the door securely closed, and is easy to operate by simply turning the knob or handle to retract the latch bolt.

DRF function

offers a powerful and convenient daytime mode for easy access from both inside and outside without a key, as well as a secure nighttime mode that allows opening from the inside without a key, while keeping the door locked from the outside without a key.

PATENTED SOLUTION
ASASS consists of a self-adjusting locking mechanism, an automatic hook mechanism, and a Comfort automatic door lock.

Automatic self-adjusting security system (ASASS) ensures excellent door performance, automatic closing, and automatic regulation of the door leaf pressure.

ASASS - AUTOMATIC SELF-ADJUSTING SECURITY SYSTEM INNOVATION

Innovative rolling elements not only reduce the force required to open a door but also ensure optimal long-term product performance.

ARX COMFORT GUIDELINES

RANGE OF BACKSETS

BS 35, 40, 45, 50, 55, 65

PROFILES

All major PVC profiles, ALU profiles, composite doors, wood doors

RANGE OF USE

Height 2700 mm for single and French door

ADDITIONAL PROPERTIES

Easy installation using one piece striker

The quality of ARX COMFORT hardware is confirmed with 10 years warranty ARX COAT ant-corrosion protection, which achieves GRADE 5 for surface protection.
